

Company presentation

2019

PLASTIC
УЗЛОВАЯ

JSC «Plastic» is one of the largest petrochemical enterprises in Russia in the segment of ABS-plastics

Geographical location

Uzlovaya, Tula Region, Central Federal District, Russian Federation, 200 km from Moscow

Manufactured articles

Article

Capacity

Styrene

60 000 tonnes per year

ABS-plastic (Asahi Chemical Technology, Japan)

23 000 tonnes per year

Polystyrene (EPS)

12 100 tonnes per year

Automobile construction details

> 3 000 tonnes per year

Consumer goods

340 tonnes per year

JSC «Plastic» is included in governmental list of chemical enterprises, having sizeable effect on manufacturing industry

Enterprise is included in the "support list" of Ministry of Industry and Trade and Ministry of Housing and Building

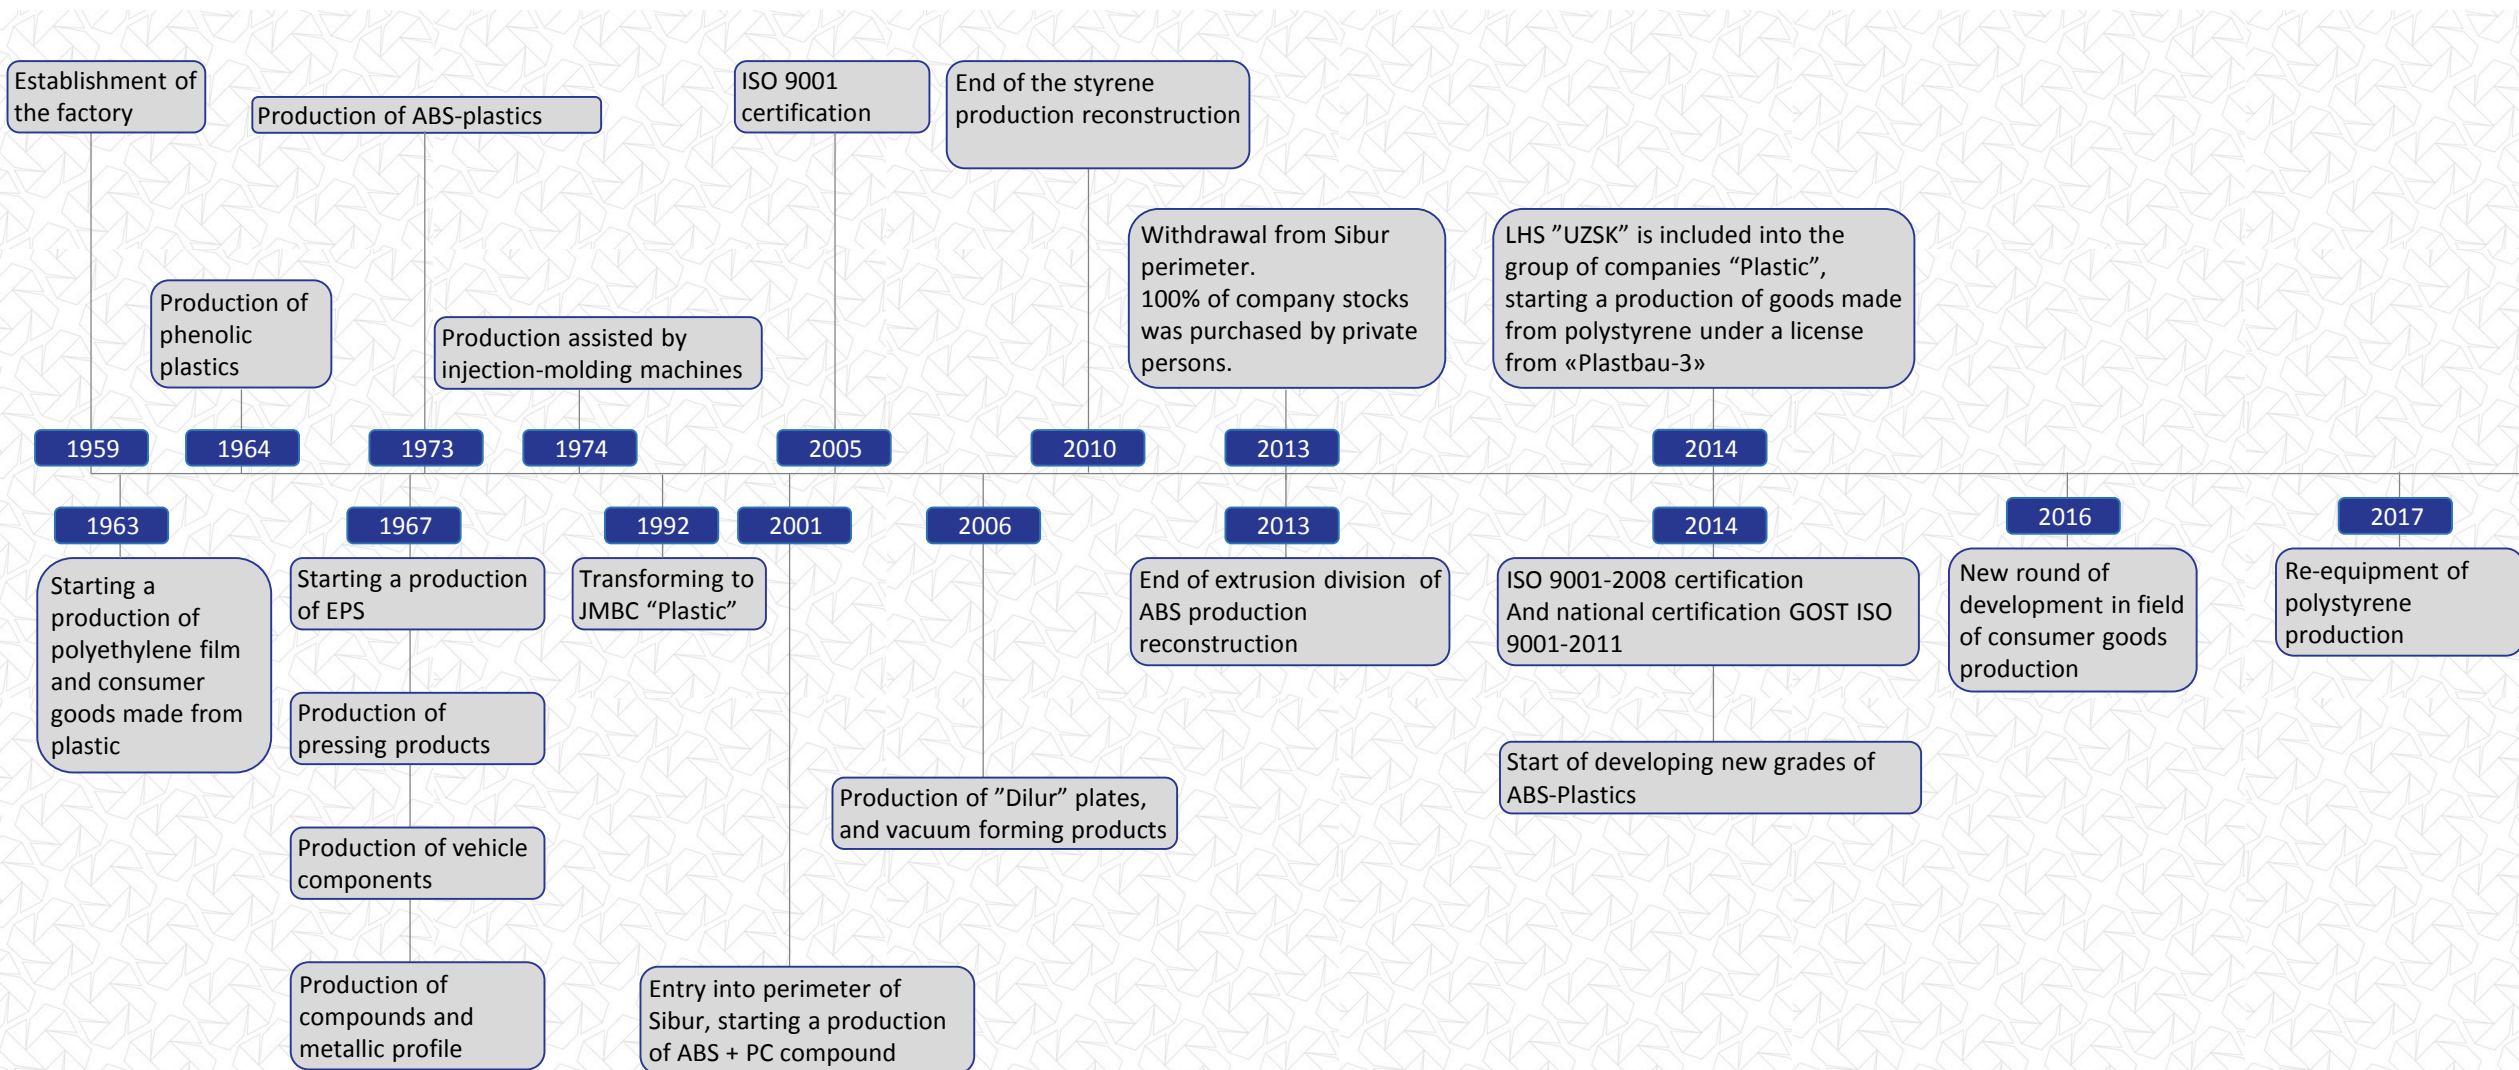

JSC «Plastic» - local economic mainstay

Regular staffing of the group of companies "Plastic" is 938 employees

PLASTIC
УЗСК

“Plastic” was established in 1959

Manufacturing

“Plastic” operates and is being developed in several areas: the production of monomers and polymers and the processing of polymers by various methods

LLC “UZSK” produce goods made from polystyrene under a license from «Plastbau-3»

Sales

LLC «Trading House Plastic» is an authorized agent of OJSC «Plastic» and attend to sales and promotion of manufactured production

Procurement

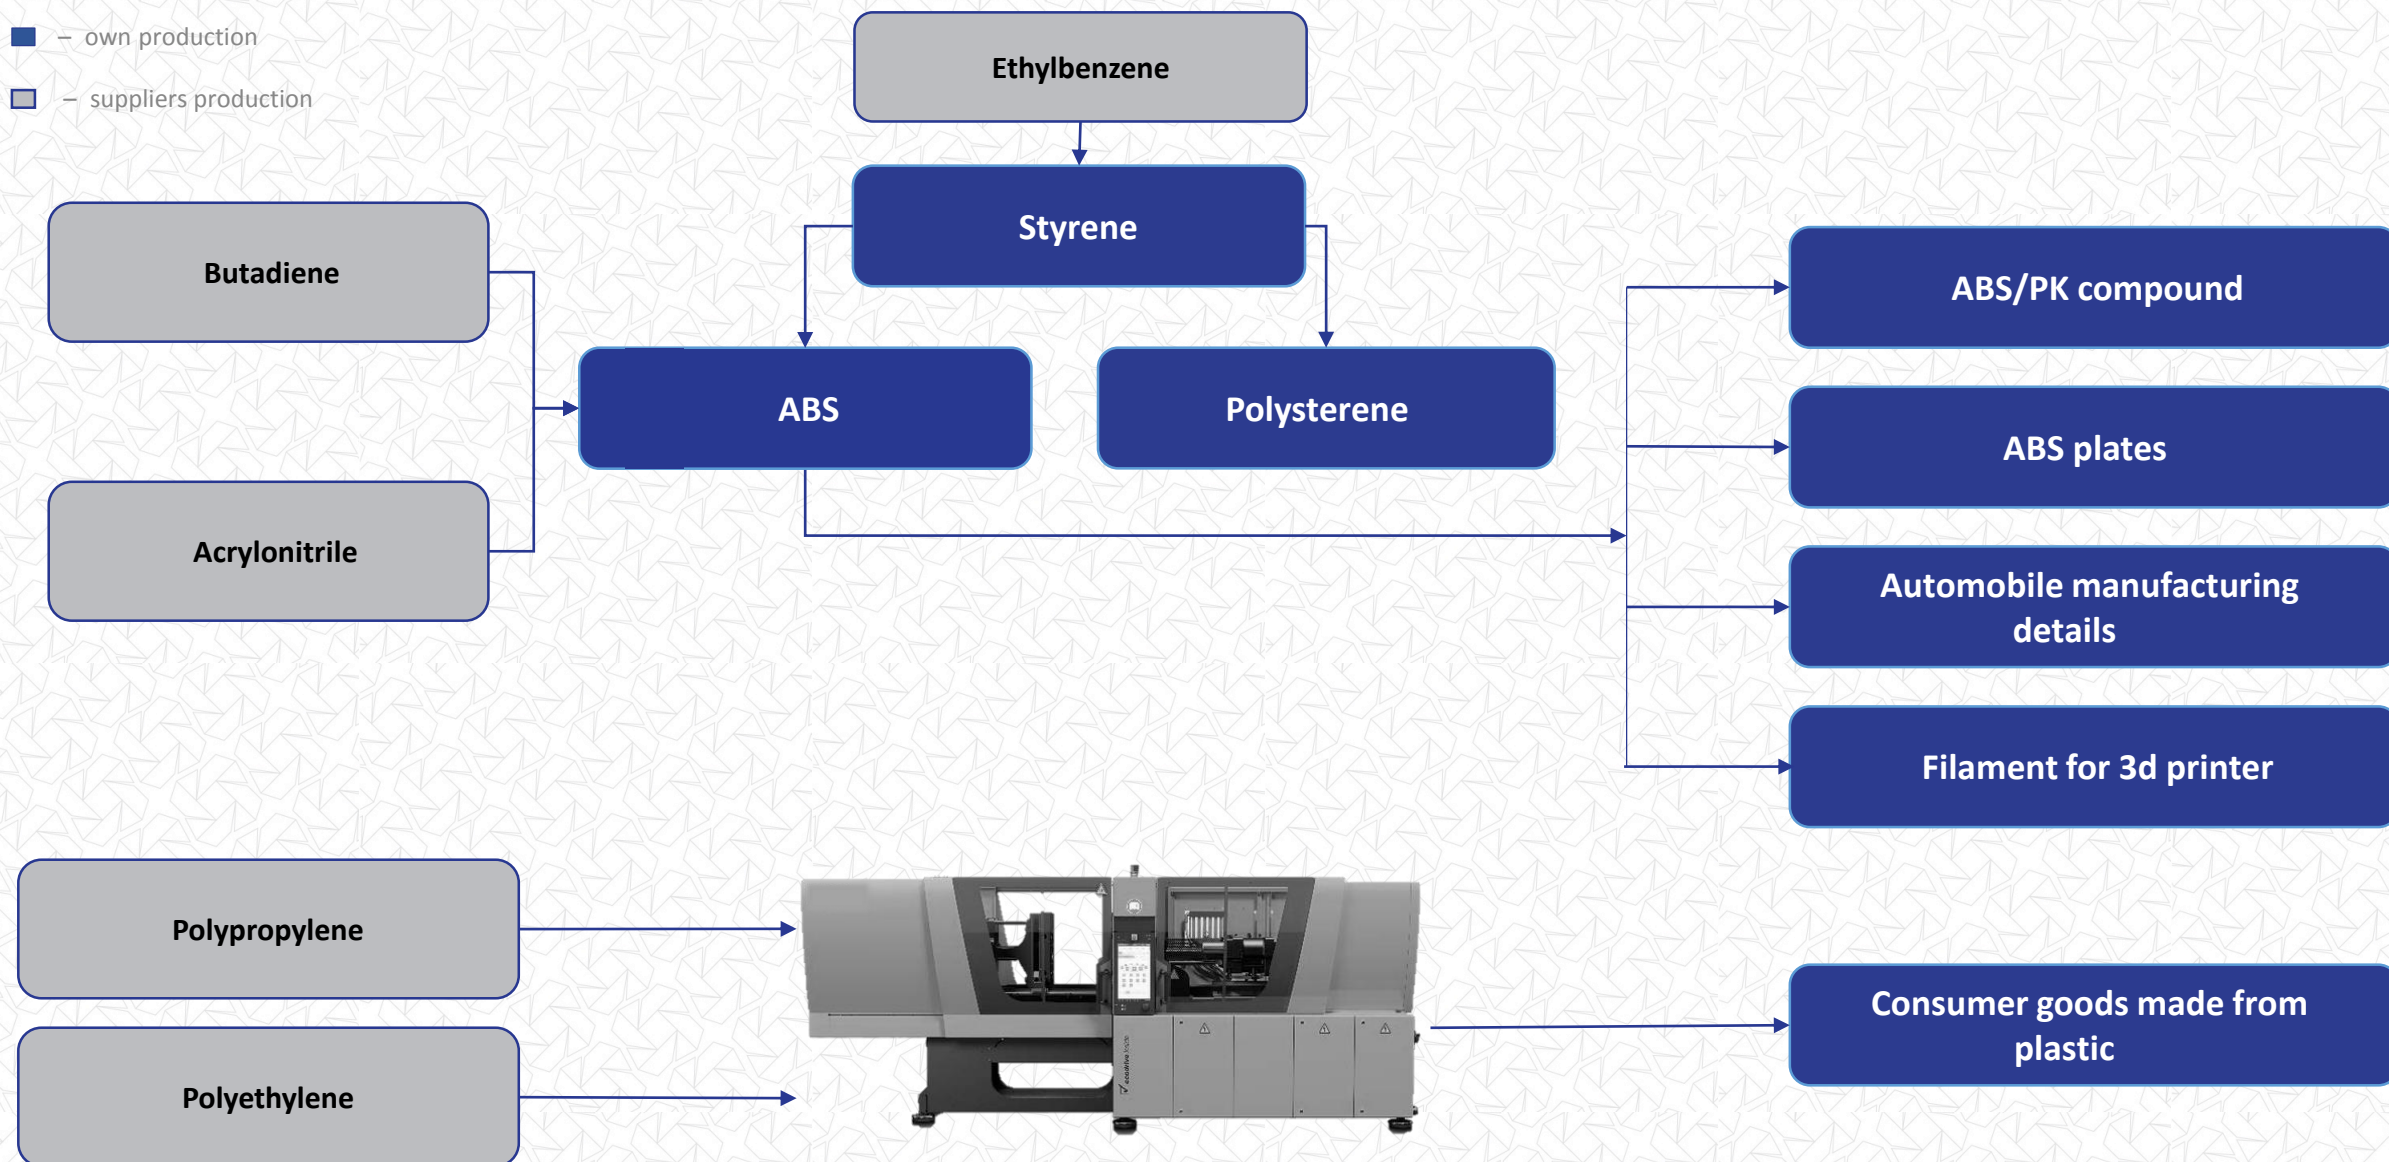

LLC «TEK-SNAB» is an authorized agent of OJSC «Plastic» in the area of procurement of raw materials for internal requirements

Logistics

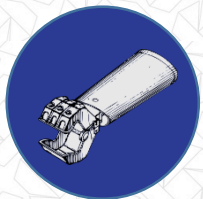

LLC “Plastic-Trans” is an authorized agent of OJSC «Plastic» in the area of cargo forwarding by railway or freight transport

- – own production
- – suppliers production

Unity consists of:

Section 20
Maintenance department

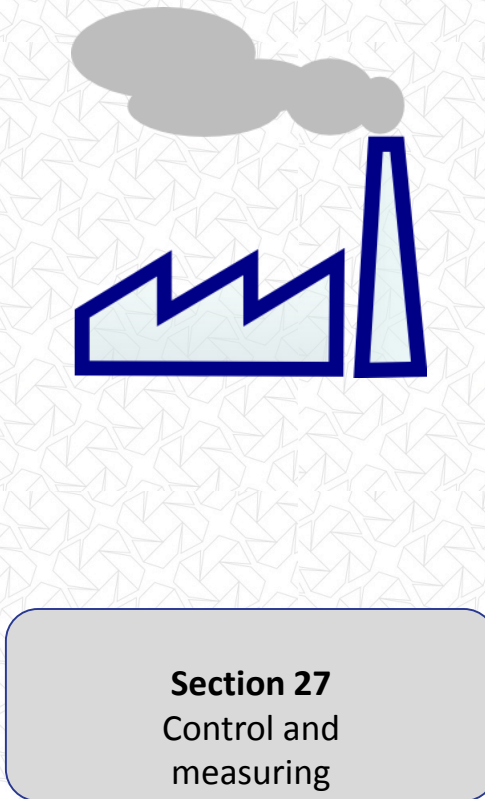

Section 21
Water supply and
wastewater purification

Section 22
Steam supply

Section 23
Air separation and
refrigerating

Section 28
Construction

Section 26
Electricity supply

Section 31
Transport

Section 32
Purification and treatment
facilities

PLASTIC
UZI OVAJA

Branch of appliance

ABS

Automotive industry

Electrotechnics and household appliances

Toys, consumer goods, medical equipment

EPS

Plates, blocks

Engineering structures

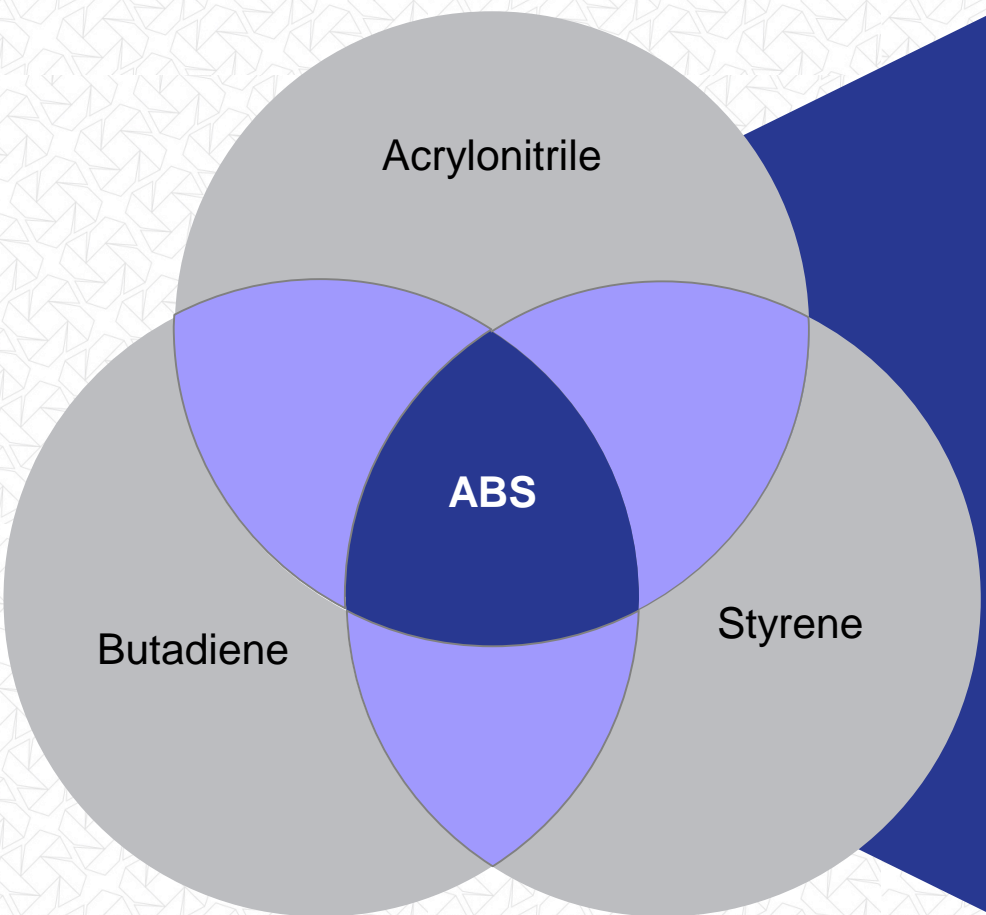

Insulation

The primary product is ABS

Chemical constitution

Strengths of ABS material

- Workability
- Crash-worthiness
- Long-term strength
- Elasticity
- Possibility of coloring
- Affordable price

ABS appliance

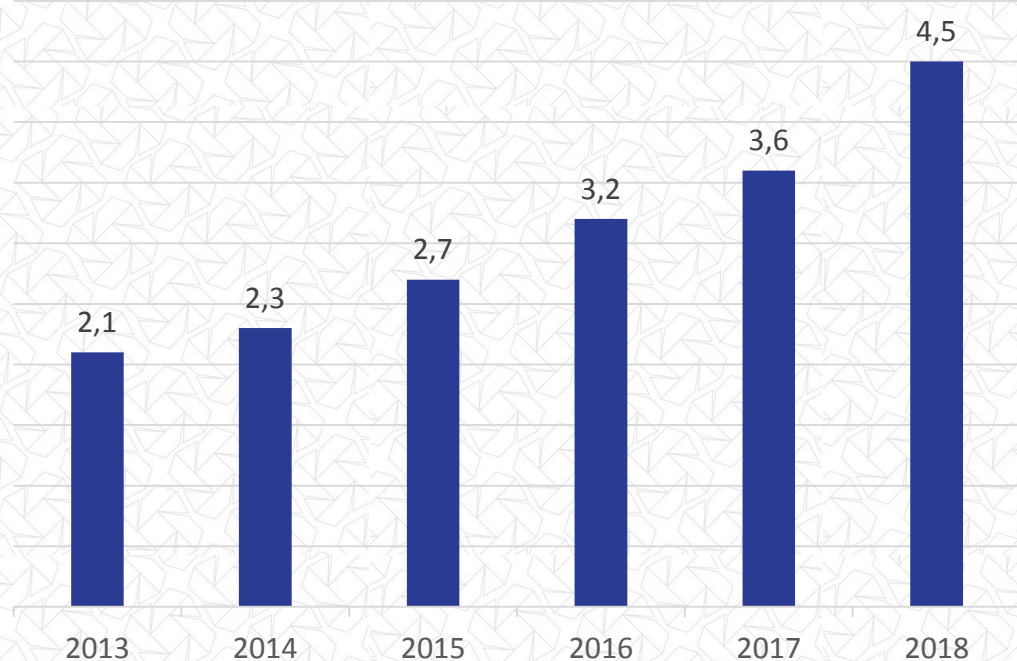

- Instrument-making
- Radiotechnics
- Medical
- Electrotechnics and household appliances
- Automotive industry
- Others

PLASTIC
УЗЛОВАЯ

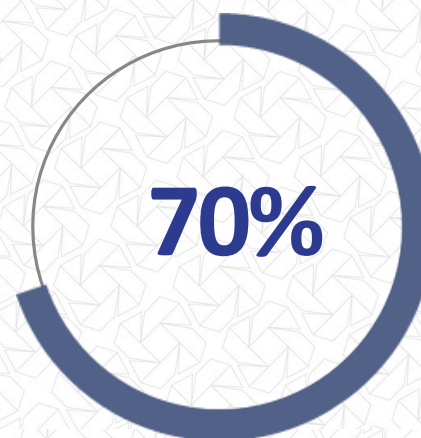

Key figures

Operating income (billion RUB)

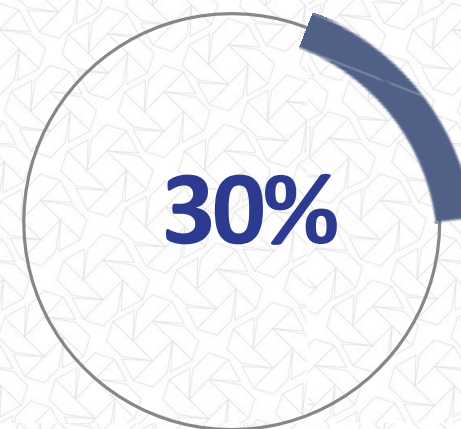

The main business activity of the company is petrochemical production

Share of the Russian market in the segment of ABS-production

Share in production

Share in sales

Nowadays “Plastic” is dynamically developing company, holding stable positions in ABS segment of Russian market

There are 3 types of plastic processing, applied in the factory: extrusion, vacuum forming and molding (24 injection molding machine)

Modifier for rigid PVC compounds

Grades: ABS-15F, ABS-20F, ABS-28F

Used to provide impact strength and heat resistance of the compositions of PVC alone or in mixture with other modifiers: chlorinated PE, acrylic modifiers, a methyl methacrylate butadiene styrene modifiers.

The product is combined with rigid PVC and the additives for processing (waxes, fillers, lubricants, stabilizers, etc.) Has a stabilizing effect for the compositions of PVC.

An additional feature is the stability of the mechanical properties of PVC profiles at low temperatures, improving the heat resistance

Fields of application

Russian market potential – more than 14 000 tones per year.

Thank you for your attention!
